- ☒ the international application in the language in which it was filed  
☐ a translation of the international application into \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing  
☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper  
☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.  
☐ filed together with the international application in electronic form.  
☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/US05/04741

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-36</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-36</u>	NO
Industrial applicability (IA)	Claims <u>1-36</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-63 lack novelty under PCT Article 33(2) as being anticipated by Granger et al. Granger discloses misuse resistive transdermal opioid dosage form comprising addictive drug and its antagonist that is released upon ingestion of the dosage form or solvent immersion. The opioid is present in the dosage form separated from the antagonist wherein the antagonist is encapsulated.

Claims 1-36 lack an inventive step under PCT Article 33(3) as being obvious over Granger et al. Granger discloses misuse resistive transdermal opioid dosage form comprising addictive drug and its antagonist that is released upon ingestion of the dosage form or solvent immersion. The opioid is present in the dosage form separated from the antagonist wherein the antagonist is encapsulated.

Claims 1-36 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
